

Solar Ground mount and pile driver

Who are we

[DSE group](#) (Dutch Sustainable Energy group) is founded in 2009 and started with PV solar installations in 2010. We spring from a company called Arends Techniek, who has been active in installing solar in the Netherlands for a long time. We have done many installations ranging from small residential up to large scale industrial systems. Together with our teams, we have commissioned over 2800 solar installations. In 2015-2016, we did an average of 15 solar systems per week in the Netherlands. DSE Group is now active in Ghana. For the Ghana market we have imported a pile driver for shooting poles in suitable grounds for mounting solar systems.

Orteco 800 smart pile driver.

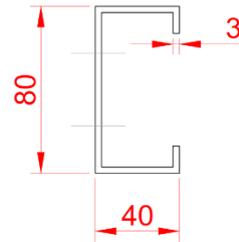

Are you working in the solar market of Ghana and you have a solar project with ground mount?

Our machine is for rent including:

- Transport from, and to location.
- Minimum 2 operators for operating the machines and setting out solar field.
- Laser unit for setting field on right level.

Our standard mould for ground poles is 80x40 C shape.
(See drawing)

Options:

Option 1:

You supply your own ground mount system.

Maximum pole length is 3.5 meter. Preferable the shape of poles is 80x40. (other dimensions are possible but for this we need extra time for ordering mould that fits the size).

- Rent of machine including transport and operators for installing poles on field.
You lay out and mark the ground for shooting the poles.

Option 2:

We also supply the ground mount and install the ground poles for you on site as given by drawings.

Option 3:

We supply ground mount and do full installation of the ground mount including solar panels.
(we are open for any other options)

Pricing:

For a detailed quotation we need a specified solar layout and total installed capacity in kWp.
Please send your request to info@dsegroup.nl or call **00233-557800170** (also whatsapp)
